All the greenery of the image used to enhance your desktop is completed by the Leaf window color. Home and End options: Find more information about the components of the theme on the "HOME" and

---

"END" options on this page, or in the "Theme Information" section. Keyboard Navigation on the desktop This theme is very well designed to make the desktop navigation more intuitive than in the default desktop. To do this, it is essential to have the Zoom option on, which is activated automatically by the theme, and by the menu item "Zoom: [.]", which is designed to help the user to zoom in, zoom out or change the zoom percentage when required. Another feature that has been designed to be especially helpful is the keyboard navigation, as if the mouse is moved in a corner of the desktop, the 81e310abbbf
