A simple but very intuitive and comfortable gadget to get the latest news stories. It has a sidebar which can be populated with RSS-feeds from various sites. You can choose to display them by the date or by site's domain. If you prefer the list format, you can also select which channels you want to see on the page. The main advantages are: you can filter and sort out the feed items; you can change the style of font; you can choose a delay; you can enable a ticker; and, of course, the number of feeds is unlimited. The feed source is very flexible - it can be chosen manually or you can also use the server's feed reader. With this gadget you can also see the latest posts from all your favorite web resources. Features: * Two types of lists: by date or by URL; * Different font styles and typography; * Change fonts and colors of the title (fonts and color are customizable); * Preview of images and GIF animations; * The number of feeds is unlimited; * The delay is customizable (for example, to 50-60 seconds); * The ticker can be enabled and disabled; * A history of changes and the most recent version of Gerz Feeds; * The color of the most recent version is shown as a light blue color. * In all other cases, you can specify the colour by yourself. You can also display and sort the feed items manually, and you can also filter them. The main advantage is that you can have access to the site's feed reader. And: * Autoupdating to the newest version automatically when any changes are made to the source, so you will always be up-to-date. * Auto-replacing of the font to the most current font; * Auto-fixing of the font to the most current font; * Automatically scrolls to the new news; * Various filters to exclude some channels; * Configuration of the width, height and position of the bar in your browser window.
