YouTube Song Downloader is a lightweight software application built specifically for helping you download audio and video files from the Internet. Straightforward interface It sports a clean layout that offers quick access to a set of well-organized functions. You don't need special computer skills to configure the dedicated parameters. Fast searching options YouTube Song Downloader gives you the possibility to carry out the searching process by typing in the name of the artist or song title into the primary panel. What's more, you are able to download the video or extract the audio streams, preview the clips from the Search panel in popup windows, as well as play, pause, or stop the current video or audio selection, alter the volume, and switch to a full screen mode. The tool enables you to grab both the video and audio streams for the selected item, search for entire albums, view a list with the downloaded files from the Internet, remove the items, and open the target locations for the video and audio files directly from the main panel. When it comes to configuration settings, you are allowed to pick the video format (AVI, MP4,FLV), audio format (MP3, OGG), and MP3 quality, as well as choose the saving directories for the audio and video files. It is important to mention that the utility is able to grab multiple items at the same time and provides very good output results. It doesn't eat up a lot of CPU and memory, so the overall performance of the computer is not hampered. A simple yet efficient downloader All things considered, YouTube Song Downloader combines ease of use with fast searching options for helping you download video and audio files. The straightforward layout makes it an ideal app for beginners and professionals alike.
